

TEXT RECYCLING GLASS BOTTLES

What happens to

the old glass bottles?

The bottles are taken on a bottle bank

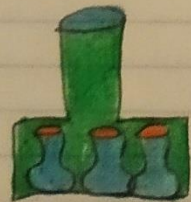

Bottles jars are taken into a lorry

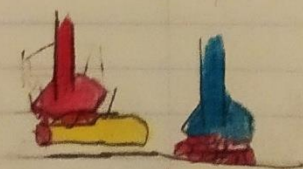

At the port bottle tops and leads are removed

Finally the hot liquid glass is drawn out of the furnace and fed into machinery that makes it bottles.

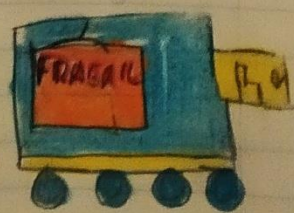

Glass is crushed into small pieces

The jars are melted in a furnace

The crushed glass is sent by a lorry to a glass factory

Crushed glass is mixed with amount of silica sand
