MYSTERY DISAPPEARANCE OF ENGLISH TEACHER: STUDENTS SUSPECTED

MARISA PLAZAS, ENGLISH TEACHER AT IES LOS MOLINOS, LEAVES
EVERYONE WORRIED AND WATCHFUL

Reporter: Candela Andreu Ros, student

On 5th March, she was reported disappeared, having not attended the school that morning. The teacher had never been in trouble with anyone at the high school before, so no one knows what could have happened.

The day before, everything was going as usual, until she corrected the exams of the most terrifying class she has. From then on she started to behave strangely. "She was changed, as if each exam had burned her from the inside", said one student. It wasn't the first time this had happened, so they didn't make a big deal out of it.

The last time she was seen was that same day, on the way out of the school. She

Last known photo of Marisa, the disappeared teacher.

was talking to one of the students who failed.

It is still not known who is to blame for the incident, nor is it known what state she is currently in. The police have already started investigating the case. They are on the trail of the pupil she was talking to. The boy seems relaxed, without any sense of guilt, which puzzles the detectives. But he gives the perfect profile of the

culprit (a troublemaker, tall, sturdy and strong, he could have carried her from one place to another without difficulty). "He's trying to throw us off the scent, but he's not going to get away, we'll find all the evidence we need to blame him, let's hope that nothing happens to the teacher while we get it," declared one of the police officers investigating the case.

Some students believe that she actually ended up going to Honolulu, "she said several times that she wanted to go there, maybe the exam marks were the trigger for her to make the decision".

However, if you see or recognise her, call 112 immediately.

CARTOON TIME!

The "rebellious" princess of the Netherlands arriving at the high school:

The "rebellious" princess of the Netherlands when she meets princess Eleanor:

BADMOUTHING THE SIGNS:

Aries

Why do you ask people for advice if then you do whatever you want to do?

Yeah, we've seen you, stop it.

Leo

Capricorn

Since you like to control everything, why don't you control your mouth too?

Nobody is attacking you, relax!

Pisces

Sagittarius

It's okay to go your own way, but the rest of us don't care about you either.

You're not going to die for doing something you don't want to do, don't worry.

Taurus

Gemini

You and your 50 different personalities can go talk trash somewhere else.

We get it, you're too intense.

Scorpio

Libra

Can you make up your mind for once?

Stop getting overwhelmed if they mess up your stuff.

Virgo

Aquarius

How does it feel to be the forgotten sign? You don't make sense.

Stop playing the victim, now!

Cancer

MY HEROINE: MILEVA MARIĆ

The existence of Mileva Marić has been ignored by the history of official science until recently.

It is thought that the mathematical knowledge of Marić was indispensable for Einstein (her husband) to develop his theories. She helped him with the research that culminated in the popular "annus mirabilis articles", about the photoelectric effect, Brownian motion and the special theory of relativity.

According to Evan Harris, the theory of relativity began with the thesis that Mileva wrote and presented under the supervision of Professor Weber, when she was studying at the Zurich University of Technology, the memory of which has been lost; and the photoelectric effect has its origin in Mileva's work when she was studying in Heidelberg with Professor Lenard. She also contributed to the Brownian motion theory with her mathematical work, describing the disordered movement of molecules.

If they had seen the enormous collaboration of Mileva before, people would know more about her and would no longer be "Einstein's wife" she would be known by the great mathematician that she was.
